PRIME series is convincing sitting comfort and elegant design. The carefully selected material and solid upholstery structure guarantee many years of stability and durability. The backrest, as well as the depth and angle of seat individually adjust to your personally sitting habits when you shift your body weight. You feel these advantages as soon as you sit down. You will finally find the comfort which you have earned.

Synchronized mechanism technology with locking system which follows the backwards and forwards motions of the user.

This ergonomically designed headrest in the consideration of the neck curve can be adjusted to provide a proper curve degree for the user.

The height of the headrest can be adjustable depending on the position of the user's neck and minimize the stress on the neck.

Adjustable armrests with chrome finish and top PU pad in multi-locking position to suit individual preferences.

Premium quality leather upholstery provides superior cushioned support and durability.

Imported unique knee-III synchronized mechanism ensures maximum lumbar support.

Backrest with stylish back cover is fashionable yet durable.

The "ROCKET" aluminium die-cast base enhance stability of the chair.

Heavy duty PU casters.
